

---

Here is a chance to make money. There is going to be a rise in the price of tinfoil, for the demand is greatly increased. And this is how it is to come about: It has been discovered by M. Denis Lance, Docteur-es Sciences, and M. de Bouillane, a skilled photographer, that with the Roentgen ray the contents of sealed letters can be photographed, and that, too, in fifteen minutes. Worse than all, Gustave Le Bon's experiments prove that it can be done with ordinary rays of light. There is only one thing that will beat it, namely, to inclose our letters in tinfoil before enveloping them. So up goes tinfoil.—Ex.
